**Village of Three Oaks
Water & Sewer Superintendent
Job Description**

Nature of the Work

- To operate, monitor, maintain, and trouble-shoot the water and wastewater treatment facility and its processes.
- Work involves responsibility for the technical aspects of plant operations, compliance with state and federal operating regulations, and operations and maintenance of the underground water distribution and collection systems and sewer system. Work is performed with considerable independence under the direction of the Village Manager; subject to review through reports and results achieved.

Essential Duties and Responsibilities

- Perform all aspects of sampling, monitoring and testing required to maintain compliance with Federal State and Local regulations governing the water and wastewater treatment process, and storm water and sludge management.
- Assist with the installation and inspection of new water and sewer lines and services.
- Perform and/or supervise the installation, maintenance and repair of the physical plant, wells, pump stations and all their components.
- Act as the department's representative to the public.
- Assist in the performance of regular and unscheduled maintenance and repairs on all plant equipment and machinery.
- On call to respond to emergencies and breakdowns.
- Conduct the necessary weekend and holiday checks of the treatment systems on a rotating basis.
- Perform all work in conformance to Occupational Safety and Health Act regulations.
- Maintain open communications with the Village Manager regarding the treatment process, ground water wells, and pump stations operation and malfunctions, as well as make recommendations for repairs and improvements to these systems.
- Other duties as assigned.

Work Requirements

- Be able to perform and document various tests required by State and Federal agencies for the operation of a water and wastewater treatment plant.
- Perform daily checks of the wastewater treatment process and periodic checks of pump stations.
- Have a working knowledge of the operation, methods and procedures of a water and wastewater treatment plant.
- Have a working knowledge of the machinery used for water and wastewater treatment, and pumping stations.
- Have a thorough knowledge of mechanical equipment and the ability to diagnose and correct equipment malfunction.
- Have a working knowledge of basic machinery preventive maintenance and repair.
- Have a basic knowledge of State and Federal rules governing wastewater discharges and worker's safety.
- Have the ability to work with independence and to make routine decisions on the operation of the plant processes and equipment.

Phone: (269) 756-9221

Fax: (269) 756-3031

Training and Experience Required

- Hold a high school diploma and have adequate experience in operating a water and/or wastewater treatment facility.

Necessary Special Requirements

- Must possess a Michigan Lagoon Operator's Grade L-1 license.
- Must possess a Michigan Water Treatment Plant Drinking Water Limited Treatment Grade D-3 and Distribution System Grade S-3.
- Maintain a Michigan Class C Driver's license.

Physical Requirements

- Have the ability to descend and climb a maximum of 30 rungs to access system pump stations.
- Have the ability to lift 50 pounds.
- Have adequate respiratory function to utilize a Self-Contained Breathing Apparatus.
- Have the ability to detect and differentiate colors.
